ABOUT ME

An accomplished expert possessing entry-level proficiency in Front-end Development and Java Developer. Demonstrates exceptional skills in collaborating with cross-functional teams to unravel intricate technical challenges and actively participates in driving the company's

PROJECT

○ Sep 2023- Sep 2023

Marvel-Gallery

Created a captivating Marvel Gallery project with HTML, CSS, and Flexbox, showcasing superheroes in a visually appealing and responsive manner. Implemented Flexbox's layout capabilities to organize character information, resulting in an engaging user experience for Marvel. The flex container for the gallery employs Flexbox properties to facilitate a responsive and well-organized layout. It allows items to wrap onto the next line.

○ Oct 2023- Oct 2023

Parallex effect

The Parallax Effect project employs HTML and CSS to create a visually dynamic webpage. The HTML structure includes sections for content, while CSS introduces background images and styles. The parallax effect is achieved by adjusting background positions based on scrolling, creating an illusion of depth. Smooth transitions and subtle animations enhance the user experience. This project showcases the potential for engaging web design through simple HTML and CSS techniques, providing a visually captivating and interactive webpage.

○ Sep 2023- Sep 2023

Adventure website

Embark on a digital adventure with our HTML and CSS-based website. Featuring captivating visuals, a responsive design, and intuitive navigation, explore thrilling services, meet our passionate team, and seamlessly connect through our contact section. Join us for an immersive experience, where every click sparks the spirit of exploration.
